

Covid 19

Information about our continuity plan

Dear Valued Customer,

AIGLON Group continues to closely monitor the evolving situation of COVID-19, and takes action to safeguard the global well-being of our personnel and families, and to prevent and minimize any supply disruption.

At this time, we would like to confirm that AIGLON has a rigorous business continuity plan.

The production team and a skeleton crew in the office and laboratory are ensuring continued business. A working group has been formed and meets regularly to assess and respond to changing circumstances. Currently, there is no expected impact on the supply of AIGLON products and we are not encountering any problems with our raw material supplies.

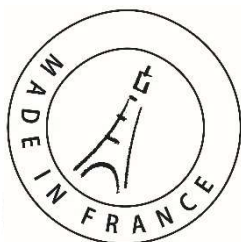

We are also closely monitoring the situation at AIGLON group raw material supplier (all European) and our haulier partners.

In case the loading / delivery of a product you are purchasing from AIGLON is impacted by any specific local measures introduced to minimize the spread of the virus, you will be contacted by your AIGLON contact who will give you further details.

During the COVID-19 crisis the situation at Aiglon remains highly dynamic. We will update you if circumstances change, but please do not hesitate to contact your AIGLON sales Manager if you have further questions.

Thank you.
Sincerely,

The Aiglon team
